FIRE INSTRUCTIONS

DURING EMERGENCY DIAL “555”

IN CASE OF FIRE

All floors and rooms are fully equipped with smoke detectors. Additionally, all rooms have sprinklers, however it is important that you familiarize yourself with these guidelines in order that you are prepared, should an emergency arise.

UPON ARRIVAL

 On entering your room, study the floor fire escape plan on the back of your entrance door. Establish the route towards the nearest fire exit which you would take in case of fire. Memorize the number of doors between your room and the fire exit. Locate and confirm the position of the nearest fire alarm and extinguishers on your floor.

IF YOU DISCOVER A FIRE

Activate the nearest fire box (marked "In case of Fire" on the floor fire escape plan) by breaking the glass panel. Dial 555 and report the exact location of fire. Stay calm, relaxed and "THINK". Exit the building as soon as possible.

Check the fire exit door for heat prior to opening it. If the staircase is safe, then exit down to the lobby level.

IMPORTANT

In case of fire, smoke or burning smell, immediately dial 555 .

Clearly indicate your room number and try to give an accurate description of the location and the nature of the cause for your concern.

 Keep calm and follow the recommendations of our staff and firemen, should they intervene. Our staff has been trained for such emergencies and will assist you.

Should you leave your room, note your room location shown in the Fire Exit Plan in relation to the EXIT stairways. Please try to stay below the level of smoke if any.

NEVER USE THE ELEVATOR DURING FIRE

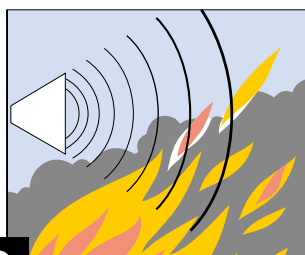

FIRE INSTRUCTIONS

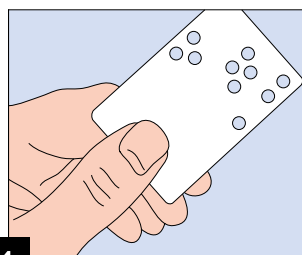

1 Please study the emergency plan on your door.

2 Fire hydrants and extinguishers are available in the corridor. All our rooms are equipped with smoke detectors.

3 If there is an emergency the fire/evacuation alarm will start automatically.

4 ALWAYS take your keycard with you. If the corridor is filled with smoke you may be forced to return to your room.

5 Walk to nearest emergency exit.

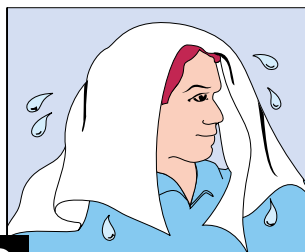

6 DO NOT use the elevators.

7 If the smoke is thick, crawl along the floor where the air and visibility is better, or return to your room.

8 When heated up the doors will expand to prevent smoke from entering the room. If there are any gaps use wet towels.

9 Protect your head and the rest of your body with wet towels. The towel can also be used as breathing protection.

10 Call the emergency crew's attention by standing in the window and/or make a lot of noise to attract their attention for help.
