

Radisson Hotel Group commitments and progress towards cage free eggs

31 December 2025

At Radisson Hotel Group (RHG), the welfare of animals raised for food is a high priority, in particular as it relates to food served in its hotels worldwide.

Commitment

RHG is committed to work towards sourcing all its eggs from cage free sources globally. This includes eggs and the use of egg products. RHG is providing its hotels with educational materials and cage free egg directories for procurement purposes, where available.

Reporting

RHG remains committed to transparency and accuracy in reporting progress on our transition towards this goal since our initial commitment taken in 2019. For hotels that share data across our 1,000-property portfolio, including a significant number of franchisees, RHG continue working toward the most comprehensive and accurate data possible.

RHG's global sustainability KPIs and results are updated annually and published in RHG's Responsible Business Report, with next update planned for the end of April 2026. This report will include current actions and further plans.

Cage free egg status

Based on the full year reporting of 2024, 234 RHG properties are using eggs from cage free chickens.

Area	2024
Europe	29%
Middle East and Africa	22%
Asia Pacific	22%
Total # hotels	234

Countries with leased properties using 100% cage free eggs:

- Norway
- Netherlands

Industry research

As a member of the World Sustainable Hospitality Alliance, RHG is actively involved in the World Sustainable Hospitality Alliance's joint industry response to the transition to cage free eggs by exploring research and viable solutions. RHG has been supporting the industry research, which will inform further implementation steps.

NGO engagement

RHG remains in direct contact with various NGOs supporting progress on animal welfare standards such as The Humane League and Humane World of Animals.
