

Thinking of travelling to Croatia?

Entry requirements for passengers from an EU/EEA member state:

We cannot wait to welcome you to our beautiful country and are dedicated to keeping you, our people and other visitors as safe as possible, so you can explore with peace of mind.

With this in mind, all passengers arriving directly from the EU and the Schengen area, regardless of their citizenship, **will be allowed entry to Croatia WITHOUT the need to present a Covid certificate or any other epidemiological certificate, and without determining self-isolation.** You also do not need to submit a travel announcement via the Enter Croatia website.

A few things to note...

All tests taken and used as supporting evidence of a positive or negative result must be recognized by European Union.

All children under the age of 12 are exempt from providing test results and self-isolation if their parent or guardian fulfils the requirements.

Thinking of travelling to Croatia?

Entry requirements for passengers arriving from third countries:

We cannot wait to welcome you to our beautiful country and are dedicated to keeping you, our people and other visitors as safe as possible, so you can explore with peace of mind.

To support the safety of all our people and visitors, we ask that you fulfil and evidence **1 of the following 6** criteria to be allowed access to Croatia:

EU Digital COVID Certificate

Proof of recovery from Covid more than 11 days and less than 180 days ago.

A **negative PCR** (taken 72 hours before arrival at the border) or **antigen test** taken (24 hours before arrival).

Proof of recovery and **first dose of vaccination** more than 14 days and less than 270 days ago.

Vaccination certificate confirming the **second dose of COVID-19 vaccine** used in EU Member States not older than 270 days. In the case of Janssen or Johnson & Johnson, a certificate confirming receipt of a single dose, more than 14 days before arrival.

Pay for a **test** on arrival and remain in **self-isolation** until a negative result.

A few things to note...

All tests taken and used as supporting evidence of a positive or negative result must be recognized by European Union.

All children under the age of 12 are exempt from providing test results and self-isolation if their parent or guardian fulfils the requirements.
